Ideal Windows Launches **'Re-Energise'** Package

Winter Sale
Now On

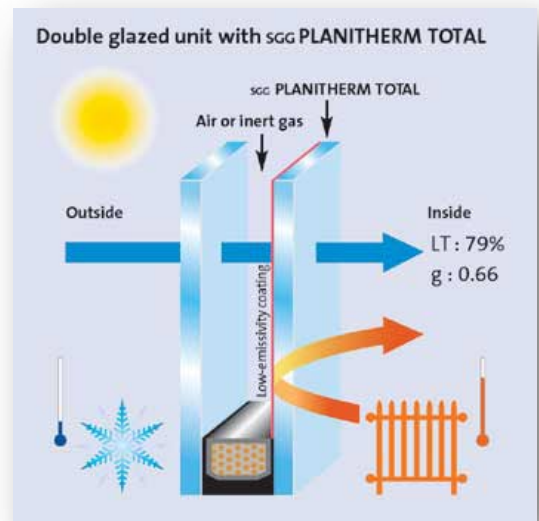

"Upgrade to 'A' Rated Glass for less than you'd think"

A

From £98 M²

Ideal have installed many thousands of windows, all of which are performing as expected. However in recent years **Glass Technology** has changed beyond belief. The latest Sealed Units are up to **100% more efficient** than the original Float Glass supplied. These New Sealed Units will **save you money** and can be installed **in to existing PVC** and **Aluminium Windows**. Subject to survey we can replace all your sealed units with the very latest St Gobain Planitherm Units. These are **"A" Rated and will reduce your heating costs.**

"Fancy a change? Georgian,

Lead, Astrical Bars – your choice!"

Once you have chosen to upgrade your sealed units, why not **enhance them** with **Leaded Lights, Georgian** Effect or even **Coloured Lead Lights**. The enhancements are limited only by your imagination. Creating a **new look** to your property and upgrading the Sealed Units at the same time makes **perfect sense.**

“Better to be safe”

Most windows have the traditional cantilever hinge allowing the window to pivot towards the centre of the opening light. Today we are all much more conscious of **hazards in the home**. All new windows installed today have to have at least one **Fire Escape Window in every bedroom**.

Old

New

Obstructed View

Clear View

We can upgrade every hinge on every window to the latest **Easy Clean Fire Escape** system. They now pivot from the corner giving full access to escape and can be moved to the centre for cleaning. This ingenious hinge is **available now!** To add that final touch we add hinge locks which are fitted to the frame enhancing the security dramatically. The additional locks keep unwanted visitors outside, where they should be.

“Just like new

Because some jobs you just can't do!”

Whilst most customers think that doors & windows are maintenance free, the reality is that without proper **cleaning and care** they can look very tired. We use the very latest cleaners that will **bring back your old windows and doors** to their **former glory**. Where timber frames have been used they can be **re-finished** using the latest microporous treatments in a **choice of colours**.

And Finally

The choice is yours, Upgrade, Enhance, Make Safer or Revive - we can do it all.

It's the smartest way to save money

and protect your largest investment - “Your Home”
